Tunghai University @ Taiwan
Office of International Education and Programs

July, 2014 No. 13

A special commencement for THU's international graduates was held by the OIEP in the Luce Memorial Chapel on June 6th, 2014. The commencement began with an inspiring talk from our dearest President Tang and the hooding ceremony. With the kind help of Vice President Chih C. Chao, all the international graduates performed the tassel shifting tradition, which symbolized the official completion of their studies. The heartwarming atmosphere deeply touched everyone attending the ceremony, and students bid a fond farewell to each other in the end. Nearly 300 international students' parents along with other family members witnessed and shared this beautiful and monumental moment.

Fellows from Mosaic Taiwan visited Tunghai University (THU) on June 30. Mosaic Taiwan is a fellowship exchange program for emerging US leaders who wish to gain firsthand experience of Taiwan. President Ming-Jer Tang of THU, Dr. Shawn Shaw-fawn Kao, Dean of the Office of International Education and Programs (OIEP), and Dr. Seng-Sheen Fan, Dean of Academic Affairs hosted a pleasant and lively luncheon with the fellows. The fellows also had a memorable time visiting THU's landmark—the Luce Memorial Chapel.

With the support from Ministry of Education and Taipei Office in Berlin, Tunghai University participated in Vocatium Education Fair in Dusseldorf on July 1st and 2nd. Over 100 German high schools students visited the Study in Taiwan/Tunghai University booth and expressed their interests in pursuing higher education in Taiwan.

Welcome to Summer Programs at Tunghai University!

- Six students from the University of Puget Sound, USA, joined the Chinese Language and Culture Summer Program at the Chinese Language Center of THU. They not only took language courses but also went on field trips to experience Taiwanese culture and the island's beautiful scenery.
- Five students from Millikin University, USA, led by Dr. Paris Barnes, joined the Summer Program in Scientific Research at THU. Under the supervision of Dr. Barnes and five professors from THU's Department of Chemistry and Department of Life Science, the Millikin students conducted research projects in the labs on campus and participated in observation sessions at Cheng Ching Hospital. They also visited Nantou, Kenting and Taipei on weekends.
